Summary

Results-driven Data Analyst with a Master of Science in Information Systems from Stevens Institute of Technology and a background in Computer Science Engineering. Proficient in Python, SQL, Power BI, and Tableau, with hands-on experience transforming large datasets into actionable insights. Demonstrated ability to design end-to-end analytics solutions — from data extraction and modeling to interactive dashboard development — as evidenced by a large-scale trade analysis project covering 13 years of UK economic data. Experienced in strategic analysis, IT risk assessment, and business process evaluation. Adept at communicating complex findings to both technical and non-technical stakeholders.

Projects

Citibank Cybersecurity Threat Analysis | — *Risk Assessment, Security Governance, Threat Modeling.*

- Conducted a comprehensive cybersecurity threat analysis for Citibank, identifying and evaluating 10 threat vectors including DDoS attacks, ransomware, insider threats, third party vendor risks, and poor data governance across critical organizational assets.
- Developed a Threat Matrix mapping risk levels (High/Medium/Low) across six asset categories Users, Intellectual Property, Work Stations, Servers, Security Devices, and Facilities to prioritize mitigation efforts for high-impact threats.
- Designed a Risk Control Matrix outlining layered preventive, detective, and corrective controls including MFA, endpoint detection, vendor due diligence, and data loss prevention aligned with GDPR and CCPA compliance requirements.

Analysis of Brexit's Impact on UK Foreign Trade | *Power BI, Excel, Data Analysis*

- Analyzed a large-scale dataset of UK trade statistics (2010–2023) to evaluate the economic impact of Brexit on import and export volumes.
- Developed comprehensive dashboards using Power BI and Excel to visualize complex trends, comparing trade patterns between EU and non-EU countries.
- Uncovered key insights, demonstrating that while trade initially declined, it recovered with non-EU markets showing significantly greater resilience and growth post-Brexit.

Stevens Podcast Launch Initiative | — *Business Strategy, Project Management.*

- Developed a strategic business plan for the creation of a new university-wide podcast, defining its mission, target audience, and value proposition to the student community.
- Designed a comprehensive operational framework detailing the content strategy, production workflow, team roles, and budget for necessary equipment and software.
- Formulated a multi-channel marketing and launch strategy to drive student engagement and build a sustainable listener base through social media and campus partnerships.

IBM IT Strategy Analysis and Modernization | *Strategic Analysis, Competitive Positioning*

- Analyzed IBM's historical IT strategy, identifying key challenges in its transition from a hardware-centric model to a services-oriented approach. Evaluated the current core strategy focused on Hybrid Cloud and AI, centered around the Red Hat acquisition and the spin-off of its infrastructure services (Kyndryl).
- Evaluated the current core strategy focused on Hybrid Cloud and AI, centered around the Red Hat acquisition and the spin-off of its infrastructure services (Kyndryl).
- Proposed strategic improvements to enhance market perception and accelerate adoption, recommending a more integrated go-to-market framework for IBM's software and consulting divisions.

Technical Skills

Programming Languages: Python, SQL, HTML, CSS

Data visualization: Power BI, Tableau, Docker, AWS, Jenkins, Linux

Education

Stevens Institute Technology

Masters of Science in Information System

Vel Tech University

Bachelor of Technology in Computer Science Engineering
